Kelvin Copilots™

Action. Control. Impact.

Real solutions by real engineers

Empowering your workforce with industrial intelligence

Take action through tailored applications that optimize operations.

CoPilots empowers your best engineers and operators with industrial intelligence, delivering measurable value to meet your KPIs.

Kelvin Copilots benefits

- 20% production increase
- Collaborate with industry and production experts
- Drive prescriptive recommendations
- Optimize end-to-end processes
- Leverage control decisions to optimize and cut carbon emissions faster

Accelerate your speed to value

Hit net-zero goals. Cut carbon faster, while boosting production to enable better decisions and make a real real impact.

- ✓ Fix your problems
- ✓ Take action
- ✓ Improve production

Kelvin. Delivering Industrial Intelligence through collaborative control

Take actions that drive impact.

Turning insights into actions that drive impact

Achieve net-zero in no time

Achieve up to 53% reduced emissions by gaining visibility into operations from process to asset.

Transform your operations to meet sustainability goals, and to reduce energy usage by as much as 40%.

Kelvin Maps benefits

> Identifies bottlenecks and equipment failures

> Prevents errors and simulate production scenarios

> Provides teams with a unified view of entire operations in real-time

> Qualify and cut real-time carbon output

> Immediately identify the problem and fix it

Unlock the power of data into actionable insights

Seamlessly fix issues with secured, collaboration tools that integrate and connect workflows to optimize operations.

✔ Find and fix issues
✔ Align resources
✔ Achieve real time visibility
✔ Prevent errors
✔ Take action
